

Webinar

Taking safety risk: jumping from real life, to safety file, to sociotechnical model

Fred Goede

Date: 2 June 2021

Time: 10:30

RSVP: Lynn.Booyesen@nwu.ac.za

SHORT BIO

Fred entered Research and Development in 1990 and since then consults widely on sustainability in both the public and private sectors. International projects focused on climate change and environment, while in South Africa his focus is specifically on air quality and safety. He lectures part-time Masters students in Johannesburg on governance, risk, compliance, data and reporting at the Centre for Applied Risk Management (UARM) at North-West University. He supervised a dozen dissertations on risk culture, now studying under the supervision of Prof Gert Jan Hofstede from Wageningen University and Research, Netherlands, complex socio-technical systems to model behavior in the context of the 4th industrial revolution. He is a registered natural scientist with SACNASP and Fellow of the Institute of Risk Management South Africa.
